EVERYDAY
An interactive discussion with Youthsafe Presenters

Everyday, young people take risks
Everyday, young people are injured as a result of dangerous risk taking

The EVERYDAY program delivers discussions facilitated by Youthsafe wheelchair presenters about risk taking designed to support the school Personal Development, Health and Physical Education Programs.

Through small group and class discussion the concept of RISK and its consequences are explored to encourage Stage 4 students to be risk aware and make safer choices everyday.

The discussion can run for 50 mins - 75 mins depending on your school's and students' needs. The EVERYDAY program is available to high schools located in Sydney the Central Coast, Illawarra and Blue Mountains. Additional information or support for school PDH/PE programs can be found on the Youthsafe website.
